evening the annual borough caucus, at which candidates for the various borough offices will be nominated, is to be held. Reference to W. W. Woodward's Forecasts.

An editorial in a Hartford paper this week reviewing the forecasts of the famous weather sharps of the country as to what might be expected about this time made mention of W. W. Woodward of Danielson, who has gained a wide reputation for making long distance forecasts by means of the old colonial system. The article finds the various forecasts somewhat at variance as to just the brand of weather that may be expected during April, but the conclusion reached after a careful review of all the prophecies is that about this time something or other in the weather line is sure to happen.
